Name: PRANJAL SWARUP BHATNAGAR Reg. No.: RA2512703010007

Course: 21CSC202J - Operating Systems

Unit – 3 : Session – 16 : SLO – 2 | Deadlock Recovery — Choose the Best Option

Answers

1. Q1. Terminate P2. It has done only 5% of its work, so aborting it wastes the least
2. computation; P1 is 90% done and P3 is an interactive user process, so both are costly victims.
3. Q2. Preempt from P2. Rolling back a process that has barely started loses almost nothing,
4. and its released resource lets P1 get the one unit it needs and finish.
5. Q3. Preemption with rollback of P2 causes the least disruption: P2 is restarted later
6. instead of being killed, P1 completes, and the interactive P3 is never disturbed.
