
Unit – 3 : Session – 5 : SLO – 1 | Priority Scheduling — Crossword

I. ACROSS

1. TURNAROUND — the total time a process takes from arrival to completion.
5. WAITING — the time a process waits in the ready queue before execution.
7. PROCESS — the unit of work to be scheduled by the CPU.
8. PREEMPTIVE — scheduling type where the currently running process can be stopped.
9. PRIORITY — scheduling where the CPU chooses the process with the highest priority.

II. DOWN

2. NONPREEMPTIVE — scheduling where once a process starts, it cannot be interrupted.
3. SCHEDULING — non-preemptive and preemptive are both types of scheduling algorithms.
4. SEQUENCE — the order in which processes are executed by the CPU.
6. ARRIVAL — the time at which a process arrives in the ready queue.
