

Unit – 2 : Session – 1 : SLO – 1 | Classes and Objects

Activity (Solution)

1. `class Product { String productName; double price; int quantity;`
2. `void display() { System.out.println("Product: " + productName + ", Price: " + price + ", Qty: " + quantity); } }`
3. `public class Main { public static void main(String[] args) {`
4. `Product p1 = new Product(); p1.productName = "Laptop"; p1.price = 55000; p1.quantity = 3;`
5. `Product p2 = new Product(); p2.productName = "Mouse"; p2.price = 499; p2.quantity = 25;`
6. `p1.display(); p2.display(); } }`
7. Output: Product: Laptop, Price: 55000.0, Qty: 3 / Product: Mouse, Price: 499.0, Qty: 25
