
Unit – 3 : Session – 12 : SLO – 1 | Deadlock System Model and Resource Allocation Graphs — Analogies

Activity 1: Analogy to Deadlock Condition

1. A car holds an intersection and won't back up — B. Hold and Wait
2. Two people block each other's way in a narrow hallway — C. Circular Wait
3. Only one person can use the printer at a time — D. Mutual Exclusion
4. A task cannot be forcefully taken from someone — A. No Preemption

Activity 2: Deadlock Condition to Analogy

- A. Mutual Exclusion — 3. A student cannot use a duster already in use by another
- B. Hold and Wait — 1. A student holds chalk and waits for duster
- C. No Preemption — 4. No student can forcefully take the chalk or duster
- D. Circular Wait — 2. Student A waits for duster with B, who waits for chalk with A
