
Unit – 3 : Session – 9 : SLO – 2 | Multilevel Feedback Queue Scheduling — Reorder the Steps

Correct Order

a → c → e → b → d

- a. Process enters Queue Q0.
- c. Process uses 8 ms CPU in Q0.
 - e. Process gets 16 ms CPU in Q1 (it was demoted because it did not finish in 8 ms).
- b. Process completes in Q1.
- d. Otherwise, if it is not completed in Q1, it is moved to Q2.
