

Unit – 2 : Session – 12 : SLO – 1 | User-Defined Packages

Activity (Solution)

1. `// file mathutils/Adder.java: package mathutils; public class Adder { public int add(int a, int b){ return a + b; } }`
2. `// file mathutils/Multiplier.java: package mathutils; public class Multiplier { public int multiply(int a, int b){ return a * b; } }`
3. `// file Main.java: import mathutils.Adder; import mathutils.Multiplier;`
4. `public class Main { public static void main(String[] args){ Adder a = new Adder(); Multiplier m = new Multiplier(); System.out.println(a.add(4, 3)); System.out.println(m.multiply(4, 3)); } }`
5. Output: 7 / 12
