
Unit – 2 : Session – 1 : SLO – 2 | Process State Transitions — Crossword

I. ACROSS

3. WAITING (BLOCKED) — the process is waiting for an event such as I/O completion.
4. TERMINATED — the process has finished and is being removed from the system.
5. NEW — the process is newly created but not yet admitted by the scheduler.

II. DOWN

1. READY — the process is waiting in the ready queue to get CPU time.
2. RUNNING — the process is being executed on the CPU.

III. State Transitions

1. New to Ready: the long-term scheduler admits the process.
2. Ready to Running: the dispatcher gives the CPU to the process (scheduler dispatch).
3. Running to Ready: the time slice expires or a higher-priority process arrives (interrupt).
4. Running to Waiting: the process requests I/O or waits for an event.
5. Waiting to Ready: the I/O or event the process waited for completes.
6. Running to Terminated: the process finishes execution (exit).
