Name: PRANJAL SWARUP BHATNAGAR Reg. No.: RA2512703010007

Course: 21CSC202J - Operating Systems

Unit – 1 : Session – 13 : SLO – 2 | Operating-System Debugging — True or False

Answers

1. Debugging only applies to software errors, not hardware issues. — FALSE
2. A kernel crash is logged and may generate a crash dump. — TRUE
3. Performance tuning is not part of the debugging process. — FALSE
4. Trace logs are used to monitor and analyze system behavior. — TRUE
5. The top command helps monitor memory usage and process activity. — TRUE
6. Windows Task Manager cannot display network activity. — FALSE
7. DTrace can add probes to user processes and the kernel while running. — TRUE
8. DTrace uses a high-overhead mechanism that may affect reliability. — FALSE (low overhead, safe)
9. Profiling samples instruction execution to detect trends. — TRUE
10. Debugging tools help find bottlenecks and improve efficiency. — TRUE
