Name: PRANJAL SWARUP BHATNAGAR Reg. No.: RA2512703010007

Course: 21CSC202J - Operating Systems

Unit – 3 : Session – 13 : SLO – 2 | Deadlock Prevention — Necessary Conditions

Answers

1. Scenario 1: Mutual Exclusion (sharable read access removes exclusivity where possible)
2. Scenario 2: Hold and Wait (all resources requested before execution)
3. Scenario 3: No Preemption (held resources are forcibly released)
4. Scenario 4: Circular Wait (total ordering R1 -> R2 -> R3)
5. Scenario 5: None is prevented — Hold and Wait is allowed freely, so deadlock remains possible
