

Unit – 2 : Session – 1 : SLO – 2 | Constructors

Activity (Solution)

1. `class Animal { String name; String species; int age;`
2. `Animal(String name, String species, int age) { this.name = name; this.species = species; this.age = age; }`
3. `void display() { System.out.println(name + " is a " + species + ", age " + age); }`
4. `public class Main { public static void main(String[] args) {`
5. `Animal a1 = new Animal("Leo", "Lion", 5);`
6. `Animal a2 = new Animal("Momo", "Cat", 2);`
7. `a1.display(); a2.display(); }`
8. Output: Leo is a Lion, age 5 / Momo is a Cat, age 2
