
Unit – 3 : Session – 1 : SLO – 1 | CPU Scheduling and its Purpose — Scrambled Words Fill-in

Unscrambled word bank

1. varlair, rIAariv = Arrival; onicmoelpt, ooinmptleC = Completion; utrn, Trnu = Turn; Anroud, ordanu = Around; rtusB, tubrs = Burst
2. CUP, PUC = CPU; tiem, miet, teim, tmei, etim = Time
3. mixzeaim = maximize; izienimm = minimize; tzinuaiolti = utilization; eoernssp = response
4. gnudilecsh = scheduling; edsndsuep = suspended; eyrda = ready; lotpcesme = completes; encioxeut = execution; atniiWg = Waiting

Completed passage

1. CPU Scheduling is the process of deciding which process will own the CPU to use while another process is suspended.
2. The purpose of CPU scheduling is to maximize the CPU utilization and minimize the response time.
3. Arrival Time is the time at which the process arrives in the ready queue.
4. Completion Time is the time at which the process completes its execution.
5. Burst Time is the time required by a process for CPU execution.
6. Turn Around Time is the time difference between Completion Time and Arrival Time.
7. Waiting Time is the time difference between Turn Around Time and Burst Time.
