

Unit – 2 : Session – 4 : SLO – 1 | Arrays

Activity (Solutions)

- 1) `int[] arr = new int[3]; arr[0]=10; arr[3]=20;` — ERROR: valid indices are 0..2; `arr[3]` throws `ArrayIndexOutOfBoundsException`. Fix: `arr[2] = 20;`
- 2) `matrix[1][2]` — ERROR: matrix is `int[2][2]`, so column indices are 0..1; `matrix[1][2]` throws `ArrayIndexOutOfBoundsException`. Fix: `System.out.println(matrix[1][1]);` // prints 10
- 3) `cube[1][1][1] = 100; print cube[1][1][1]` — CORRECT: all indices 1 are valid for `int[2][2][2]`; output: 100.
