

Unit – 2 : Session – 12 : SLO – 2 | Using Packages

Activity (Solutions)

1. Snippet A: prints a random integer between 0 and 9 (inclusive) — e.g., 7; the exact value varies per run because `rand.nextInt(10)` is random.
2. Snippet B: prints 25 — `c.square(5)` computes 5×5 from the user-defined `mymath.Calculator` class.
3. Snippet C: prints the current date in ISO format (yyyy-MM-dd) — e.g., 2025-09-21, whatever `LocalDate.now()` returns on the day it runs.
