

Unit – 2 : Session – 10 : SLO – 1 | Inheritance with Overriding**Activity (Solution)**

1. `class Figure { double dim1, dim2; Figure(double a, double b){ dim1=a; dim2=b; } double area(){ System.out.println("Area undefined for Figure"); return 0; } }`
2. `class Rectangle extends Figure { Rectangle(double l, double w){ super(l, w); } @Override double area(){ return dim1 * dim2; } }`
3. `class Triangle extends Figure { Triangle(double b, double h){ super(b, h); } @Override double area(){ return 0.5 * dim1 * dim2; } }`
4. `public class Main { public static void main(String[] a){ Figure f; f = new Rectangle(10, 5); System.out.println("Rectangle area: " + f.area()); f = new Triangle(10, 5); System.out.println("Triangle area: " + f.area()); } }`
5. Output: Rectangle area: 50.0 / Triangle area: 25.0
