Name: PRANJAL SWARUP BHATNAGAR Reg. No.: RA2512703010007

Course: 21CSC202J - Operating Systems

Unit – 1 : Session – 13 : SLO – 1 | OS Design and Implementation — Riddles

Answers

1. Design Goals (user goals and system goals)
2. Policy (decides WHAT will be done)
3. Mechanism (decides HOW it is done)
4. Microkernel
5. Monolithic kernel (monolithic structure)
6. Assembly language
7. Implementation
8. Portability

Key idea

1. Separating policy from mechanism lets policies change (e.g. scheduling priorities)
2. without rewriting the underlying mechanism (e.g. the timer and context switch).
